Mišel Brzulović

Senior QA & Devops Engineer

(+33)6.31.93.89.77 – brzulovic@gmail.com – https://brzulovic.github.io

Senior QA DevOps Engineer with 20+ years across software development, QA automation, DevOps and infrastructure engineering. Currently extending this expertise into AI engineering, with hands-on work in AI agents, MCP, LLM infrastructure, automation and AI-assisted QA. Strong track record in CI/CD, test architecture, cloud, virtualization and cybersecurity for enterprise and critical systems.

XP Overview

AI Engineering / DevOps R&D		| 2026
Senior QA DevOps Engineer	SLB (Schlumberger)	| 2023– 2025
Backend DEVOPS Engineer	Fifteen	| 2022
QA DEVOPS Engineer	Haproxy Tech	| 2021 – 2022
Senior Technical QA Engineer	Fircosoft/LexisNexis	| 2016 – 2021
QA Manager	Outscale	| 2015
Technical QA Project Manager	Meetic Group	| 2012 – 2015
Fullstack Developer	Meetic Group	| 2007 – 2012
Web & Flash Developer	Mypixmania	| 2006/ 2007

Skills

Soft skills

Team spirit & strong interpersonal skills
Adaptability in changing environments
Creative thinking & initiative
Proactive, solution-oriented approach
Curious, resourceful, and a fast learner
Calculated risk-taking / strong problem-solver

Languages

French: Native / Fluent
Serbo-Croatian: Mother tongue
English: Professional / Technical fluency
Romanian: Intermediate
German: College level / Reading-Writing

AI Engineering & Agentic Development

AI Agents, MCP, Pi Coding Agent, OpenCode, n8n, Ollama, llama.cpp, LiteLLM, OpenWebUI, OSS & Frontier LLMs

Observability

Grafana, Prometheus, Uptrace, GCP Logging

CI/CD & DevOps

Jenkins (Advanced/Pipeline Script), Azure DevOps (Cloud/On-Premise), GitHub Actions, GitLab CI, Concourse, Dagger.io, Bamboo

Containerization & Virtualization

Docker, Docker Compose, Kubernetes (Helm), Hyper-V, Vagrant, Virsh, QEMU, VirtualBox

Infrastructure as Code

Terraform, Packer, Ansible, Consul, Universal Packages

DataBases & Servers

MongoDB, PostgreSQL, MySQL/MariaDB, Oracle, SQL Server, Nginx, HAProxy, Apache, Lighttpd Git Svn

Programming & Scripting

Python (Advanced), Go, Bash/Shell, PowerShell, PHP, Java, Ruby, JavaScript, VBScript, SQL

Testing & Automation

Selenium WebDriver, TestComplete, Bats, Goblin, Venom, TestNG, Cucumber (BDD), TestLink, Redmine

Operating Systems

Linux (Arch, Ubuntu/Debian, RedHat/CentOS), Windows Server (2012/2022), macOS, arm64 Mainframes (z/OS, AS400, AIX, Solaris, HP-UX),

Softwares

Vim Tmux Eclipse Netbeans Photoshop Illustrator Indesign Flash AfterFX Premiere 3DSMax Blender Maya

Mišel Brzulović

Senior QA & Devops Engineer

Experiences

AI Engineering & DevOps R&D – Independent – 2026

Personal Technical R&D / AI Engineering Lab

- **AI Agents & MCP**: Built and tested AI-agent workflows using Pi Coding Agent, OpenCode and custom **MCP servers** for development, testing and automation.
- **LLM Infrastructure:** Self-hosted **OSS & frontier LLMs** with Ollama, llama.cpp, LiteLLM and OpenWebUI; evaluated models for development and QA use cases.
- **DevOps & Automation:** Deployed multi-service AI applications with Docker Compose, n8n and Linux/ARM infrastructure; managed service routing through HAProxy on DietPi/Raspberry Pi.

Senior QA DevOps Engineer - SLB (Schlumberger) / 2023 – 2025

Surface-Logging Development Team | Oil & Gas Sector

- **CI/CD Automation:** Migrated testing pipelines from legacy Excel sheets to Azure DevOps Test Plans using custom Python scripts. Designed multi-stage Cloud and On-Premise pipelines for automatic test execution.
- **Infrastructure:** Managed a centralized lab infrastructure hosting over 90 Hyper-V virtual machines (Windows, Kali Linux) with automated fallback and archiving scripts.
- **Modernization & Security:** Directed an Industrial Automation and Control Systems (IACS) cybersecurity compliance project, deploying automated security patches via PowerShell. Spearheaded migration from SVN to Git Azure DevOps utilizing Universal Packages for heavy binaries.
- **AI Integration:** Deployed localized LLM tools via Docker (Ollama, OpenWebUI) to optimize internal development workflows.

Backend DevOps Engineer - Fifteen / 2022

Urban Mobility and IoT Solutions

- **Backend Development:** Developed Go-based microservices utilizing MongoDB and gRPC protocols.
- **Testing & CI/CD:** Built Go unit tests via Goblin framework and deployed a Proof of Concept (POC) for integration testing using Venom. Orchestrated deployments via Concourse and Terraform into Kubernetes clusters on GCP.
- **Observability:** Implemented distributed tracing and monitoring workflows using Grafana, Uptrace, and GCP Logging.

QA DevOps Engineer - Haproxy Tech / 2021 – 2022

Load Balancing & Enterprise Proxy Software

- **Quality Audit:** Conducted extensive quality assessments across community and enterprise products (HAProxy, DataplaneAPI, Fusion, Ingress).
- **Automation:** Built automation test suites using Bats, Vagrant, Terraform, Docker, and Docker Compose. Resolving critical GitLab CI pipeline bottlenecks.

Senior Technical QA Engineer - Fircosoft/LexisNexisRS / 2016 – 2021

Financial Compliance & Anti-Money Laundering Solutions

- **Quality Assessment:** Owned quality engineering for core compliance C-based filtering tools across highly heterogeneous environments (Windows, *nix, Mainframes z/OS, AS400).
- Framework Architecture: Designed and developed a containerized test framework using Python and Docker.
- **CI/CD Transition:** Migrated and optimized legacy automated CI jobs from Bamboo to Jenkins scripted pipelines. Led development on the customer web portal using PHP and MariaDB.

Mišel Brzulović

Senior QA & Devops Engineer

(+33)6.31.93.89.77 – brzulovic@gmail.com – https://brzulovic.github.io

QA Manager - Outscale - 2015

Sovereign IaaS Cloud Provider

- **Team Leadership:** Managed a team of 4 Python/QA Automation Engineers.
- **Strategy & Release:** Accountable for end-to-end quality metrics across cloud systems, internal tools, and frontend websites. Automated manual tests on Jenkins, establishing KPI reporting and pipeline administration.

Technical QA Project Manager - Meetic Group – 2012 - 2015

European Leader in Dating Platforms

- **Automation Architecture:** Designed and deployed a custom automation system using Selenium WebDriver, TestNG, Watir, and Cucumber (BDD). Built a customized Selenium-IDE plugin for Firefox.
- **DevOps & Systems**: Installed and administered Jenkins clusters, QA servers (Linux Ubuntu/Windows), Git repositories, Nginx, and custom Node.js WebApps. Developed a Java-based desktop app (`JgitAgent`) for environment orchestration.

Fullstack Developer - Meetic Group - 2007 - 2012

European Leader in Dating Platforms

- **Development:** Developed scalable frontend and backend web components utilizing PHP and Web Services (REST, SOAP).
- **Optimization:** Refactored complex legacy PHP code structures and optimized heavy SQL queries for Oracle/MySQL. Built a dedicated WS framework for iOS/Android platforms and integrated billing solutions via Highdeal.

Web & Flash Developer - Mypixmania – 2006 - 2007

Online Photo Printing Service

- Developed PHP, JavaScript, and database backends
- Developed rich Flash components (Photobook layouts).
- Optimized URL-Rewriting and SQL performance.

Web Developer & various – Various - 1998 – 2006

- 2004 – 2006 Logistics Manager – Fabio-Lucci/Tati
- 2002 – 2004 Associated Entrepreneur – Arkos (Serbia)
- 2002 Photo Designer – ColorFoto Barac (Serbia)
- 2001 Flash Developer – Créatures for Coca-Cola
- 2001 ASP Developer / WebMaster – Datavance
- 2000 WebMaster/WebDesigner – Creative Web

Degrees

- 2015 ISTQB Foundation Level Certification
- 2000 Multimedia Designer training
- 1999 Deug Médiation Culturelle & Communication – Université Paris 8

Hobbies

- Hacking technical u
- Movies & Series (Thriller SF)
- Philosophy, DJ electro, Chess, Checkers, Backgammon, Rummy, Ping Pong
